- Zbrush
- Photoshop
- Substance Painter
- 3D-Coat
- Marvelous Designer
- Keyshot
- Arnold

Yi Ou

Character Artist/Concept Artist/Outsourcing Coordinator

Summary

Highly creative and versatile 3D artist with over a decade of professional experience specializing in character art. Demonstrated success working in dynamic corporate teams and as an independent freelancer. Art style spans a wide range—from realistic and semi-stylized AR/VR games to hand-painted MOBA titles, fantasy-style MMOs, and simple, cartoony mobile games.

Work Experience

Yi Ou Art

Self Employed, 09/2012-Present

- Created DOTA Workshop items from concept to implementation, including design, modeling, UV mapping, texturing, skinning and marketing art. Recognized for a player-focused approach to idea generation and concept development, resulting in one of the most well-received character skins in the Dota 2 community, with a high acceptance rate.
- Collaborated with Valve on contract-based concept designs for Immortal character items.
- Played a key role in the development of multiple mobile games by creating 3D and 2D assets, managing entire game scenes, and collaborating closely with engineering teams from concept to delivery.
- Produced artwork featured in official TOOL band concert merchandise, including signed posters and T-shirts.
- Authored and illustrated a children's book, crafting both the storylines and all accompanying artwork.
- Featured artwork in the Japanese magazine 365Art+
- Produced 3D prints of anime-inspired characters and detailed accessories like earrings.

DigiNova

- Collaborated with my business partner to define the company's art direction, including website design and presentations.
- Engaged with clients to understand project requirements and preferred art styles,

Microsoft

Character Artist, 09/2020 — 04/2022

- Created realistic character assets, including clothing, props, and hair cards developed with X-gen for HoloLens projects.
- Developed semi-stylized 3D character assets based on concept art and photo references, designed for use as Microsoft Teams avatars with easily swappable accessories.
- Designed and conceptualized character props to match the existing style.
- Managed assets throughout the entire production pipeline and conducted thorough testing with engineering team in Unity.

Cryptic Studios

Character Artist, Outsourcing Coordinator, 09/2010 — 09/2012

- Designed and created character assets, including main characters, NPCs, and weapons, etc. Collaborated closely with concept artists to import assets into the Cryptic Game Engine, ensuring style consistency and unification.
- Collaborated with the outsourcing team in China by providing ongoing requirements and feedback for asset development. Traveled to China to establish the workflow and pipeline for the external art team. Worked closely with the Art Lead to maintain style consistency.
